## Summary

---

A Salesforce Developer with over 2 years of experience, proficient in Apex, LWC, and SOQL/SOSL. Known for excellent problem-solving skills and the ability to quickly learn new technologies.

## Experience

**Capgemini:** Senior Software Engineer, PUNE, Maharashtra 09/2021 – Present

- I am currently employed as a Salesforce Administrator and developer for the Sales Cloud and related applications for a well-known beverage client.
  - I contributed to building a registration page for the client using the Lightning Web Component.
  - Effectively inserting and extracting data using SOQL queries, and running batches every week in Salesforce Data-loader and Workbench.
  - Hands-on proficiency with Salesforce Flows/Process Builder for automation.
  - Previously worked for an automobile client, analysing and writing Apex test classes for one of their applications.
  - Excelled in ensuring data security and access control by leveraging roles, permission sets, sharing rules, and role hierarchies.
-
